

Autism Hampshire is holding a course of six free Autism Support and Information workshops for families of autistic children and young people, across Hampshire.

Workshop Details

- The aim of the course is to provide insight, advice and support prior, during or post a child's assessment and diagnosis.
- Each session will explore a child's unique way of experiencing the world, and suggest practical ways in which their differences can be accommodated and supported.
- The focus will be on nurturing the autistic child and their characteristics rather than teaching them to 'mask' or 'pass for normal'.

Workshop Format

Each workshop is three hours long. The first part consists of a presentation after which there will be an opportunity for questions.

Who Should Attend?

- Family members and others closely associated with the care and support of the child.
- Professionals may only attend in their capacity as parents or carers (except for CAMHS professionals).

Session Schedule

Session 1 – Introduction to the Neurodiversity approach. Provides the foundation and context for the other sessions.

Session 2 – Autistic Thinking. Explores how differences in brain structure can generate some unique and individual styles of thinking, and offers practical advice on how to support some areas of difficulty.

Session 3 – Autistic Communication. Discusses autistic perspectives on the use and processing of communication and ideas for adapting interactive styles in order to respect and accommodate them.

Session 4 – Autistic Social Interaction. The focus is on rethinking social expectations and helping autistic people develop relationships in an authentically autistic way.

Session 5 – Autistic Sensory Perception. Demonstrates how atypical sensory perception is manifested in stims, how to interpret them, and suggests things to try in the absence of viable strategies created by the person themselves.

Session 6 – Behaviour. Demonstrates how accepting, understanding and adapting to how children and young people see the world can dramatically reduce anxiety and behaviours of concern.
