

Residential Services

All residential homes are registered with the Care Quality Commission (CQC) and hold a good rating.

The emphasis is to encourage service users to fully participate and be involved in the day-to-day running of their home, while enjoying and following their own chosen interests. As well as being encouraged to diversify and try new experiences.

Each support package embraces the principles and practices of Person-Centred Planning Approach. Enabling choice and individuality are of paramount importance.

The philosophy of each home is to support each person to develop their level of independence as fully as possible and achieve their goals.

- We encourage full social inclusion and believe that for those who want to, they are given the fullest opportunity to develop appropriate social networks.
- We support the opportunity for higher education and employment where appropriate and all support plans are focused on the individual and the needs specific to them.

**Our Residential Care Services have Care Quality Commission (CQC) Reports.
You can find the reports for our services below**
